Deeds Not Words 2018-02-06 richly illustrated with 12 maps and 46 photos the lightning campaign that toppled the saddam hussein regime in iraq in the spring of 2003 seemed to herald the arrival of a new way

of war as germany s blitzkrieg had done at the beginning of world war ii but the initial victory soon devolved into a persistent counterinsurgency conflict reminiscent of the long u s effort to pacify the philippines after the rapid defeat of spain in 1898 in iraq american soldiers and their coalition partners had merely traded one fairly weak and generally conventional opponent for a more deadly diverse and determined foe relying on the tactics of the guerrilla and the terrorist this volume focuses on that second and longer campaign but rather than a narrative of the overall course of the conflict it provides a soldier s eye view of the war by focusing on detailed accounts of selected engagements each illustrates the everyday challenges that america s soldiers faced in a difficult struggle against an inventive and often elusive enemy weapons doctrine and procedures developed to fight a conventional campaign against a similar opposing force had to be adapted to fit a different type of conflict the u s army s combat and support forces brought both resourcefulness and resilience to this task while continuing to demonstrate the same courage shown by previous generations fighting the nation s battles these stories not only symbolize the tip of the spear formed by units in contact but they also represent the contributions of all american men and women who have served their country in operation iraqi freedom taken together these accounts will provide our deploying leaders and soldiers a better understanding of the environment that they will encounter and prepare them for the work that must be done

Actors, Artists, Authors & Attempted Assassins 1991 many of tony blair s policy decisions in the israeli palestinian arena were controversial and politically costly blair labour and palestine argues that gaps between him and much of his party were rooted in different world views a positive attitude towards israel came to be seen as a defining mark of new labour loyalists however contrasting views among left leaning strands in the party reflected a broader set of ideological rifts such differences became increasingly significant in the wake of 9 11 as british policymakers sought to understand and respond to islamic anger against the west based on interviews conducted by the author and on previously unseen documents this unique case study shows how the distinctive world view of a political leader defined foreign policy by shaping britain s response to islamist violence and its interconnected approach to the israeli palestinian conflict author toby greene also examines the extent to which ministers and officials considered shifting foreign policy in response to fears of islamist radicalisation in the uk and blair s role in stopping this trend especially after the 7 7 bombings

Misalliance Not So Misaligned 2005 bookshelves in the age of the covid 19 pandemic provides the first detailed scholarly investigation of the cultural phenomenon of bookshelves and the social practices around them since the start of the pandemic in march 2020 with a foreword by lydia pyne author of bookshelf 2016 the volume brings together 17 scholars from 6 countries australia canada germany the netherlands the uk and the usa with expertise in literary studies book history publishing visual arts and pedagogy to critically examine the role of bookshelves during the current pandemic this volume interrogates the complex relationship between the physical book and its digital manifestation

relationship brought to widespread public and scholarly attention by the global shift to working from home and the rise of online pedagogy it also goes beyond the digital bookshelf to consider bookselling book accessibility and pandemic reading habits

Health Affairs 2004 pandemic re awakenings offers a multi level and multi faceted exploration of a century of remembering forgetting and rediscovering the influenza pandemic of 1918 1919 arguably the greatest catastrophe in human history twenty three researchers present original perspectives by critically investigating the hitherto unexplored vicissitudes of memory in the interrelated spheres of personal communal medical and cultural histories in different national and transnational settings across the globe the volume reveals how even though the great flu was overshadowed by the commemorative culture of the great war recollections of the pandemic persisted over time to re emerge towards the centenary of the spanish flu and burst into public consciousness following the outbreak of the covid 19 pandemic the chapters chart historiographical neglect while acknowledging the often unnoticed dialogues between scientific and historical discourses probe silences and trace vestiges of social and cultural memories that long remained outside of what was considered collective memory

Blair, Labour, and Palestine 2013-07-18 in 2019 the who came out with a scoping review related to the evidence on the role of the arts in improving health and well being in the last yeast in fact literature has recognized the direct and indirect benefits of art in the prevention and promotion of mental and physical health and in the management and treatment of disease although some countries have made progress in developing policies that make use of the arts to support health and well being many have not yet addressed the opportunities that exist for using the arts to support health and for others policy activities have been time limited nonetheless the relationship between art and health has existed since the birth of medicine itself and has strongly influenced its history and its evolution art therapy is the main expression of art in health care the integration of art in traditional health assistance paths

sustains the need to have a holistic approach to health wellness and well being both of patients and other stakeholders including caregivers and healthcare professionals currently the main area of art therapy application is mental health with especially regards to disability both in developmental age and in elderly and both to cognitive and physical impairment and dementia however it is important to remark that mental health does not only refer to mental illness but also to people s emotional psychological and social well being these last cases have particularly worsened with the long lockdown periods due to the covid 19 pandemic
