scientific discoveries often build on and are inspired by previous discoveries if the scientific enterprise were a tower of blocks each piece representing a scientific finding scientific progress might entail making the tower bigger and better block by block discovery by discovery rather than strong wooden blocks imagine the blocks or scientific findings can take on shape based on scientific accuracy the most accurate pieces are the strongest and sturdiest while the least accurate are soft and pliable building a tower of the scientific enterprise with a large number of inaccurate blocks will cause the tower to start to wobble lean over and potentially collapse as more and more blocks are placed upon weak and faulty pieces
